DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-19, 27-39, drawn to a spittoon and a printing mechanism having such spittoon, classified in class 347, subclass 36.
- II. Claims 20-26, drawn to a method of purging ink, classified in class 347, subclass 35.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the printing mechanism of Group I can be used in a materially different process of using that product, for example, the printing mechanism of Group I can dispense any type of inks in any order rather than the particularly type of inks in a particularly order as claimed in Group II.

Art Unit: 2861

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
